Precise Piece Counting

Counting function delivers precise piece counting. Preprogrammed reference sample quantities of 5,10, 20,50 or 100 parts.

Dual Display

Most models come with an optional customer side second display.The second display is on the rear side or in case of platform scales come with a 5m cable display that can be be mounted on the wall or kept on table.
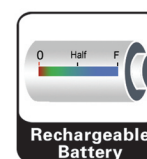

Retain Zero Setting

Suitable for tank weighing application,this setting stores the zero in the memory.Even after the machine is turned off & on,the reading shown is residual weight and not zero.

Backlit LCD Display

Selected models come with backlit LCD display.

Rechargeable Battery Pack

Built in 6V 4Ah rechargeable battery provides 40–100 hrs.of backup time depending on different models and scale configuration.Under power save mode the backup times can even be better.

Auto Weight Summation

Simple to use,fast and easy way to perform count and accumulation of sequential weighments.

### Price Calculation

Selected precision balances have price mode to enter gold rate & compute value with press of a button.Can also be used as a programmable unit by entering a multiplicative factor.e.g.GSM calculation.

Animal Mode Weighing

Selected models come with this feature which supports weighment of moving objects.
